CONCRETE BENCH 39

462.00 €

An original model, laid on comfort, warmth of the wood and the off-beat shape of the bearing concrete part. The construction is supported by two legs made of high-performance fiber concrete and natural aggregate. The structure has the possibility of different color combinations and consists of natural marble or granite stones. The concrete surface is embossed. The planks are made of certified wood. All components are further treated with a protective coating, which makes the product even more resistant to aggressive weather conditions. The fasteners are from stainless steel. Despite its classic composition, the comfort in the seating area is preserved through the specially intended ergonomic design. Great decoration for various urban areas, parks, alleys, schools, playgrounds and other public spaces.

Diameter: 190.0 cm

Length: 75.0 cm

Height: 90.0 cm
