CONCRETE BENCH 40

435.00 €

The bench is made of high-performance reinforced fiber concrete and natural aggregate combined with the warmth of a certified wood. The aggregate structure is available in different color combinations and consists of natural marble or granite stones. The concrete surface has a characteristic relief. The addition of protective coating on the concrete and wooden components makes the product even more resistant to aggressive weather conditions. The convenience of having access on both sides makes it suitable for busy urban areas. Simple and modern, this bench model is an elegant addition to park alleys, wide streets or in front of office buildings.
