CONCRETE CUBE BOLLARD 149

544.00 €

Product from Encho Enchev - ETE company catalog, which meets the modern standards of functionality and aesthetics. Parking restraint made entirely of high-performance concrete and natural aggregate. The concrete is reinforced and fiber strengthened. The aggregate consists of natural marble or granite stones of defined sizes and different colors. The following combinations are possible: top polished surface combined with embossed sides or fully polished surfaces. The anti-parking body is additionally protected with a special coating. This makes the product even more resistant to aggressive weather conditions and reduces the deposition of dirt. The anti-parking cube can be anchored to the floor. In addition to being a limiter, the model is also available as a concrete chair. It complements the cityscape and creates an opportunity for a short break in the busy everyday life. A product that is timeless. These characteristics guarantee durability and long service life. A preferred solution for limiting car traffic and parking in front of offices and administrative buildings, hospitals, universities, schools, kindergartens, metro stations, terminals, bus stops, parks and other public areas. Convenient and functional equipment blocking the access of cars to pedestrian areas, sidewalks, bike lanes, beaches, gated complexes and private properties.
