Concrete Stool 268 R seat polished, sides exposed aggregate

404.00 €

Chair made of high-performance, reinforced, fibre concrete with natural aggregate. The aggregate structure is made of natural marble or granite stones and is available in different colours and sizes of its constituent particles. The various technological methods of the aggregate surface treatment create a sophisticated combination of fine polishing and gentle relief. A special protective coating is applied on the surfaces. It makes the product even more resistant to aggressive weather conditions and reduces the deposition of dirt. It can be used alone or as an element of a composition to the [Modular Bench Model 268](#). Exterior solution for any park, garden or playground.
